Journal import limits and CSV template

A single journal entry may contain at most 500 lines. Split larger files.

CSV columns: date, account, debit, credit, entity, memo, currency.

Dates must be ISO-8601. Debit and credit are mutually exclusive per line.

Imports over 10 MB should be split. The API import endpoint shares the invoice API rate li mit of 120 requests per minute.

Balanced journals only: total debit must equal total credit in the journal currency before FX translation.

Intercompany journals require both entities to belong to the same workspace.
